Product Description

Bearcat CHF9540H 9-inch PTO Fine Chipper

MAINTAIN POWER. REDUCE MAINTENANCE.

Using a Crary® Bear Cat® PTO machine reduces engine maintenance, giving you more uptime to work. With a wide selection of PTO machines ready to go to work for you, it's time to match your tractor with a Crary Bear Cat PTO Chipper and Chipper/Shredder.

This 9-inch capacity Orchard Chipper has 16 reversible chipper blades that produce some of the smallest chips in the industry. With a low profile discharge, it places chips directly onto the ground. Auto-feed speed control system is a standard factory-installed feature on this machine. The hinged service cover allows easy access for maintenance and clean up.

NOTE – For Use On Tractors with PTO Horsepower Ratings From 35 hp to 60 hp

CE compliant model available
